P.G. Diploma in Industrial Management

Post Graduate Diploma in Industrial Management (PGDIM) aims to groom young managers who will not only design better procedures and systems but also manage the associated technologies successfully.

With the globalization of Indian economy coupled with opening up of industrial sector, career opportunities are up for grabs. Many MNCs, Joint Ventures and even the indigenous companies are attracted to India's liberal economic policies and thus want to set up production facilities and factories across the country.

Degree programs in industrial management engineering typically cover the process of operating, designing and managing production systems
