## Post Graduate Diploma In Biotechnology Engineering

### Description

Post Graduate Diploma in Biotechnology is Diploma level Biotechnology programme. PG Diploma programme in Biotechnology will provide students with a sufficiently broad range of both fundamental principles and innovative practices in the subject to be able to apply their knowledge proficiently in the relevant industries. Candidates will learn research and development skills to enable the creation of new products and services. You will investigate the economic basis for current biotechnology structures and areas of future demand, including the global pharmaceutical industry and carbon sequestration. You will learn how technology can be applied to solve pressing real-world biological problems and gain the skills and expertise needed for future developments in biotechnology.

### Course Content

- Economics and Innovation in the Biotechnology Industry
- Intelligent Agriculture
- MSc Dissertation (Biotechnology).
- Biobusiness
- Bioinformatics Programming & System Management
- Principles of Industrial Biotechnology
